

## Minimally Stimulated Ketamine Infusion Therapy (MSKIT)

Neuro-optimization is why ketamine infusion therapy is so effective.

We've developed the best-practice method called MSKIT. By using optimal dosing, our patient outcomes surpass those of other clinics. In our intentionally calm and quiet environment, your brain reaches a theta wave state. This state triggers the release of neuro-regenerative proteins like brain-derived neurotrophic factor (BDNF), enhancing your brain's function. This process, known as neuro-optimization, is what makes MSKIT so effective.

## rTMS Therapy

Repetitive Transcranial Magnetic Stimulation Therapy offers long-term relief for those suffering from depression and other mental health disorders. It is a non-invasive, non-drug therapy that does not require downtime.

We are one of the few clinics nationally to offer Stanford Accelerated Intelligent Neuromodulation Therapy (SNT) protocol. It is currently the most successful therapy for treatment resistant depression.

Here to provide better.

## Better Starts Here

We are a locally-owned clinic that specializes in Ketamine Infusion and TMS Therapies to treat mood disorders and chronic pain. Since 2019, our mission has been to help those struggling with treatment-resistant illnesses through brain optimization therapies. Our #1 goal is always remission of symptoms.

## Our Mission

Our mission is to provide better individualized care, better treatment options, and better outcomes for our patients.

## Conditions We Treat

- ✓ Depression
- ✓ Anxiety
- ✓ PTSD
- ✓ OCD
- ✓ Suicidal Ideation
- ✓ Chronic Pain
- ✓ Brain Fog
- ✓ Long-COVID

## Our Vision

Our vision is to be the leader in opioid-free pain management and mental health treatment, creating a standard of care that results in better outcomes and improved brain health.

## Better Individualized Care

Your comfort and health care needs are our utmost priority. We exclusively employ Certified Registered Nurse Anesthesiologists (CRNAs) to administer ketamine treatments to patients. Our patients feel safe and comfortable throughout the entire treatment process because of our experienced and compassionate team. We always put our patient's safety needs first, providing and delivering exceptional care from assessment, through treatment, and beyond stabilization therapy.
